

SKAN[®] SS Flexible Connectors

SKAN SS Flexible Connectors

- An easy to install, fully flexible, 316 SS connector, that will save you time and money on those difficult jobs joining A to B.
- Proven time saver in OEM applications
- Full Bore; a 25mm threaded end has 25mm internal diameter pipe
- No deformity in the curvature
- No rubber or plastic hose that will reduce flow
- Will not corrode or rust
- No galvanic effect. No dielectric union required
- Resists work hardening

Watermark approval

ATS 5200.489:2009 Certificate No. 23092

Extremely flexible

Greater flexibility than braided type connectors, and will not crimp or kink

Suitable for potable water

Residential, Commercial and Industrial

SKAN SS Flexible Connectors

Specifications

Body material	316 Stainless Steel
Sizes	12mm (½") to 50mm (2")
Lengths	300mm (12") to 1500mm (60", 5 ft)
Maximum Working Pressure	3000 kpa (435 PSI)
Applications	Pump installations, overcome the frustration of pipe fracture due to pump vibration Water heaters, Sinks, Toilets and most water flowing appliances Water treatment and filtration installations
